

Train your DAX™ Copilot

Differences between DAX Full Service and DAX Copilot

DAX Full Service

With DAX Full Service, after your encounter is completed, it will be reviewed by a Quality Documentation Specialist (QDS). They will process the recording, transfer the clinical summary and any dictated information directly into the EHR.

DAX Copilot

DAX Copilot is integrated directly into PowerMic Mobile and Dragon® Medical One, and the clinical summary is available immediately after you complete the recording. Using your voice, you can tap into a full suite of customizations, templates, and shortcuts that allow you to personalize your notes using Dragon Medical One's advanced speech capabilities and time-saving EHR workflows.

When to use DAX Full Service

- You want the clinical summary placed into the note in the EHR
- You want information copied and pasted from the EHR into the note
- You want to use your templates
- You want your note customized to your preferences

When to use DAX Copilot

- You want the note immediately after the recording is finished
- You want to use Dragon Medical One to add your auto texts
- You want to edit the clinical summary on your phone or desktop
- You are seeing patients that are not on your schedule

How to decide which service to use

Do you need the note shortly after the visit?	DAX Copilot
Do you need information copied and pasted into the note?	DAX Full Service
Are you doing a visit that is not on your schedule?	DAX Copilot
Do you have certain formatting requests?	DAX Full Service
