

Disable Bluetooth directions for iOS device

In certain instances, connected Bluetooth devices that utilize a microphone or audio settings can interfere with recording in DAX Copilot. This document can be used to install/configure a third-party mobile application to disable/enable Bluetooth when the PowerMic Mobile application is opened/closed.

Install Shortcuts application

- Open the Shortcuts application on your iOS device.

- If the Shortcuts app is not installed, scan the QR code below to download it from the Apple Store. (Direct Link: <https://apps.apple.com/us/app/shortcuts/id1462947752>)

Configure Shortcuts application

1. Launch the Shortcuts application on your device.
2. Select the **plus (+)** symbol in the upper right corner of the window.
3. Select the **Controls** button, located just below the Search bar.
4. Scroll to the Connectivity section and select **Set Bluetooth**.
5. Select **Turn Bluetooth On**.
6. Select **Done**. You will be brought back to the home page and see a “Set Bluetooth” button.
7. Press and hold the Set Bluetooth button to open it. Select **Rename**.
8. Change name to **Set Bluetooth On** and then select **Done**.
9. Repeat **Steps 2 through 4** to create a new shortcut.
10. Tap the word On to change it to **Off**. Then select **Done**.
11. On the home page, press and hold the newly added “Set Bluetooth” button and choose **Rename**.

12. Change the Name to Set Bluetooth **Off**. Then select **Done**.
13. The newly added shortcuts will be at the top of the screen.

Configure automations

1. Select Automation, located at the bottom of the app.
2. Select **New Automation**. NOTE: If an automation already exists, click the plus (+) in the upper right corner of the window.
3. Select **App** from the Personal Automation list.
4. Select **Choose**, tap the **PowerMic Mobile** application from the list, and select **Done**
5. Select **Is Opened** and **Run Immediately**.
6. Select **Next**.
7. Select the **Set Bluetooth Off** shortcut, located under My Shortcuts.
8. Repeat steps 2 through 4.
9. Select **Is Closed** and **Run Immediately**.
10. Select **Next**.
11. You should now see the new automations in the Automation screen of the application:
